

Bhopal gas tragedy

Gateway Green Alliance
Universal African Peoples Organization

Black & Green Wednesday

Bhopal... 20 years ago, a Union Carbide factory belched a cloud of deadly gas over a working class neighborhood of Bhopal, India. It was the worst industrial disaster in human history. 4000 people died immediately, and many thousands more continue to die or live in misery.

This could happen here! Union Carbide walked away leaving thousands of tons of toxic waste to contaminate the environment and water supply of the community.

In 2001, Dow Chemical purchased Union Carbide but has refused to clean up the site or to release material warnings about its poison gases or to help with the ongoing rehabilitation of survivors.

In 2004, the danger of chemical spills near chemical factories around the world. In the U.S. alone, more than 110 chemical plants in green areas could each kill one million people if an accident or terrorist attack were to occur.

Discuss the implications of Bhopal with
*Michael Ann (Director, for Indian Development)
*Dr. Lee Blount, Jr. (Health & Environ. Justice)
*Zaki Saad (Moderator, Green Party & UAPC)

20,000 dead
50,000 disabled
150,000 suffering
